SFXL

Capabilities overview

Source smarter.
Import with confidence.

Tech-enabled B2B sourcing from vetted Asian manufacturers, for importers anywhere in the world.

INDUSTRIAL PRODUCTS · ELECTRONICS · INFRASTRUCTURE EQUIPMENT

THE PROBLEM

Sourcing from Asia is easy to start, hard to control

01

Supplier uncertainty

Catalogs and listings rarely show who actually manufactures, at what capacity, and with which quality system.

02

Compliance gaps

CE, UL, UN38.3 or grid-code documents can be missing, outdated, or issued for a different model.

03

Slow communication

Time zones, language and technical detail slow down quotes, samples and changes.

04

Order blind spots

Production status, shipping documents and delivery proof end up scattered across email and chat.

WHAT WE DO

One partner from search to your plant gate

SFXL connects importers with vetted manufacturers in Asia and manages the work in between: finding the right factory, checking it, reviewing its documents, and running the order through to delivery.

Focus verticals
Industrial products · Electronics · Infrastructure equipment

Supplier search & vetting

Shortlists built from your specs, target market and volumes.

Factory checks

On-site or remote checks of capacity, processes and quality control.

Certification & document review

CE, UL 9540 / 9540A, UN38.3, VDE-AR-N 4105, WEEE and more.

Supplier communication

Technical questions, samples and changes handled for you.

Order-to-delivery management

Production follow-up, documents and delivery to your plant.

HOW IT WORKS

From RFQ to delivery in six managed steps

01

RFQ

You share specs, volumes, target market and delivery site.

02

Search & shortlist

We identify and compare suitable manufacturers.

03

Vetting & factory check

Company, capacity and quality checks before you commit.

04

Document review

Certificates and test reports checked against your market.

05

Order & production

PO, production follow-up and pre-shipment checks.

06

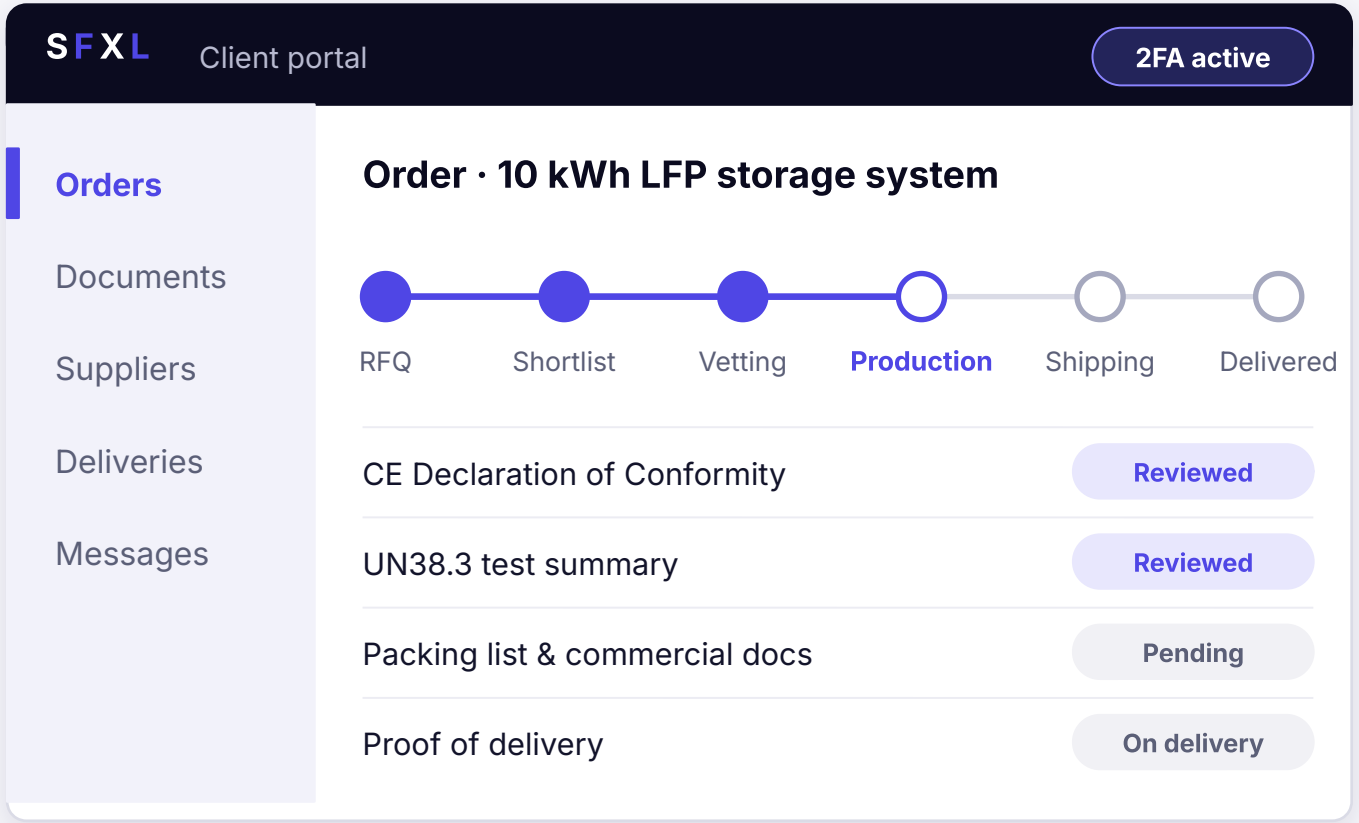
Delivery & POD

Shipping to your plant, with proof of delivery in the portal.

Every step is visible in the SFXL client portal: status, documents and messages in one place.

OUR PLATFORM

Orders, documents and deliveries in one secure portal



Illustrative interface view

Two-factor authentication

Secure sign-in for every client account.

Order tracking

Status of each order, from RFQ to delivery.

Document handling

Certificates, test reports and shipping papers in one place.

Proof of delivery

Delivery to your plant, confirmed in the portal.

CATEGORIES & COMPLIANCE

Focused on categories where compliance decides the deal

Category	Typical products	Documents we review (examples)
Solar + energy storage Flagship showcase	PV modules, hybrid inverters, LFP battery storage	CE (LVD, EMC, RoHS), IEC 62619, UL 9540 / 9540A, UL 1973, UN38.3, VDE-AR-N 4105, WEEE, EU Battery Regulation
Grid & electrical equipment	Switchgear, transformers, cables, metering	CE, applicable IEC product standards, UL listings where required, type-test reports
Heat pumps	Air-to-water and commercial units	CE, EN 14511 performance test reports, refrigerant (F-gas) documentation, energy labelling
Industrial products & electronics	Components, tools, control and power electronics	CE / UKCA, FCC (US), RoHS, REACH, WEEE

Applicable requirements depend on the product, destination market and use. SFXL reviews documents for completeness and consistency; testing and certification are carried out by accredited third parties.

WHY SFXL

Built to reduce uncertainty at every handoff

01 Vetting before volume

Suppliers are checked before you commit to an order, not after a problem appears.

02 Compliance-aware by market

Documents are reviewed against the market you sell into: the US, UK, Germany and beyond.

03 One platform, end to end

RFQ, documents, order status and proof of delivery live in a single secure portal.

04 For importers anywhere

US, UK and Germany are highlighted markets. We work with importers worldwide.

NEXT STEP

Start with one low-risk first order

1. **Send your RFQ**
   Product specs, quantities, target market and delivery site.
2. **Review the shortlist**
   Receive compared suppliers and an evaluation report.
3. **Decide on a first order**
   Start small, scoped together, and follow it in the portal.
